MD. BAYAZID AHAMED

Electrical & Electronic Engineer

bayazidahammed24@gmail.com 01755486082, 01610016560

Dhaka, Bangladesh Bangladeshi 21-08-2000

Professional Summary

Electrical and Electronic Engineering graduate with a CGPA of 3.58 and practical exposure to industrial automation, photovoltaic systems, power electronics, control systems, and circuit design. Skilled in PLC programming, HMI design, VFD control, MATLAB, COMSOL Multiphysics, Proteus, and PCB design. Seeking an entry-level role in renewable energy, automation, or electrical engineering.

INDUSTRIAL TRAINING

26/04/2026 – 22/07/2026
Tejgaon, Dhaka

Bangladesh Industrial Technical Assistance Center (BITAC)
Industrial Automation Training
Relevant areas included PLC programming, HMI design, VFD control, and pneumatic control.

11/01/2026 – 09/02/2026
Dhaka, Bangladesh

Bangladesh Power Development Board (BPDB)
Industrial Internship

Education

02/2022 – 01/2026
Dhaka, Bangladesh

Bachelor of Science in Electrical and Electronic Engineering
Green University of Bangladesh, Dhaka
CGPA: 3.58/4.00

2019
Dinajpur, Bangladesh

Higher Secondary Certificate (HSC)
Amena-Baki Residential Model School & College, Dinajpur
GPA: 4.50/5.00

2017
Dinajpur, Bangladesh

Secondary School Certificate (SSC)
Amena-Baki Residential Model School & College, Dinajpur
GPA: 5.00/5.00

Technical Skills

Automation & Control
- PLC programming
- HMI design
- VFD control
- hydraulic and pneumatic control

Microsoft office
- Microsoft Word
- Microsoft Excel
- Microsoft Powerpoint

Engineering Software
- MATLAB
- COMSOL Multiphysics
- Proteus

Website developing

Electrical & Electronics
- PCB design
- Power electronics
- Circuit design
- Equipment protection
- Renewable-energy systems

FINAL-YEAR THESIS

Enhancement of Photovoltaic Cell Efficiency Using a Hybrid Nanofluid Cooling System
Investigated a hybrid nanofluid cooling approach intended to reduce photovoltaic-cell operating temperature and improve conversion efficiency.

Additional Information

Award
Vice Chancellor's Award, Green University of Bangladesh

Interests
- Renewable energy
- Solar systems
- Industrial automation
- Travelling

Languages
- Bangla (Fluent)
- English (Upper-intermediate)

ACADEMIC & INDUSTRIAL PROJECTS

Sensor-Based Traffic Light Control
Built a sensor-based prototype for traffic-signal control.

Motor Control Using a Water-Level Indicator
Built an automatic motor-control system responding to water levels.

Buck and Boost Voltage Converter
Designed DC–DC buck and boost converter circuits.

Equipment Protection Circuit Design
Designed a circuit concept for electrical-equipment protection.

Wireless Power Transfer
Developed a prototype for contactless electrical power transfer.

Traffic Light Control System
Industrial Automation Project
- Engineered a PLC-based traffic light control system using ladder logic and timers.
- Automated signal sequencing and pedestrian crossing operations.
- Verified functionality through simulation and practical testing.

Automatic Transfer Switch (ATS) System
Power & Control System Project
- Built an ATS system for automatic switching between utility and backup power.
- Integrated relay contact or control with electrical protection features.

Industrial Motor Control System
PLC & Electrical Control Project (TIA Portal & Training Board)
- Configured Siemens S7-1200 PLC programs using TIA Portal.
- Executed DOL, forward-reverse, and star-delta motor control sequences.
